

PUBLIC HEALTH AND SAFETY MONITORING

Pro Health Infectious Disease Intercession Protocol

Use special Promo Code:
ECGCOVID

Electronic **Caregiver**[®] and Addison Care[™] are providing a customized Smart Health Hub solution for community residences to monitor health, wellness and reduce the spread of infectious diseases. Our goal is to increase health monitoring, provide early identification of health conditions, and expedite intervention to improve recovery rates and reduce mortality rates.

Not only does the Smart Health Hub help promote public safety and health, it instantly connects and informs personal Care Circles of high-risk health indications, and helps coordinate care and faster responsive action. Our solution is being used by families, medical providers, individuals, and corporations to identify health risks and monitor escalation, management, and recovery.

*Blood Pressure Monitor and Glucometer is an additional fee

No money down. Small monthly fee for 24/7, round the clock, all year-round protection and care.
